---

## PROFILE SUMMARY

Aspiring Data Analyst with hands-on experience in collecting, cleaning, and analyzing datasets using Python, SQL, and Excel. Familiar with data preprocessing, exploratory data analysis (EDA), statistical analysis, feature engineering, and machine learning algorithms to generate actionable and business insights. Working knowledge of Power BI and visualization tools for building dashboards and supporting data-driven decision-making. Experienced in developing predictive models through real-world projects, including classification and time series forecasting.

---

## SKILLS

**Programming & Tools:** Python, SQL, Excel, Git, GitHub, Jupyter Notebook, PyCharm
**Data Analysis & Visualization:** Pandas, NumPy, Matplotlib, Seaborn, Plotly, Power BI, Excel (Pivot Tables), Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Feature Engineering
**Machine Learning Algorithms:** Scikit-learn, TensorFlow, Keras, XGBoost, Regression, Classification, Clustering, Machine Learning Algorithms.
**Models & Techniques:** Random Forest, Support Vector Machine (SVM), K-Means
**Time Series Analysis:** ARIMA, SARIMA, Holt-Winters
**Statistical:** Descriptive Statistics, Inferential Statistics, Hypothesis Testing

---

## PROJECTS

### Loan Approval Prediction | Machine Learning

- Developed a classification model using **4,269 records and 10+ features** to predict loan approval.
- Applied **machine learning algorithms** and performed **feature engineering** to improve model performance.
- Achieved **97.0% accuracy and 0.976 F1-score** using an optimized **Decision Tree model**.
- Built Logistic Regression baseline, achieving **91.9% accuracy and 0.93 F1-score**.
- Improved performance using **GridSearchCV (5-fold CV)** with **F1 score up to 0.985**.
- Performed **data preprocessing, encoding and scaling**, and built an end-to-end ML pipeline.

### Air Passengers Forecasting | Time Series Analysis

- Developed a forecasting model using **144 monthly records** to predict passenger trends.
- Performed **time series decomposition** to analyze trend and seasonality.
- Built an **ARIMA (1,1,1)** model and evaluated using **RMSE**.
- Visualized **actual vs forecasted values** using Matplotlib.

## EXPERIENCE

**Internal Audit Officer (Data-Focused Role)**
Premier Mills Private Limited

- Analyzed financial and operational data using **Excel and Google Colab (Python)** to identify discrepancies and trends.
- Generated **business insights** using data analysis techniques to improve reporting.
- Built reports and dashboards to support **data-driven decision-making**.
- Improved reporting accuracy and efficiency through structured data analysis.
- Reduced manual errors by **~20%** by identifying anomalies in data.
- Improved decision-making efficiency by **~15%** through actionable insights.

---

## EDUCATION

MBA in HR & Systems
RVS Faculty of Management | 2015 – 2017

B.Sc (Information Technology)
RVS College of arts & Science| 2012 – 2015

---

## COURSE

Diploma in Data Science & Machine Learning
UPTOR/LMES Academy | 2025 – 2026

### Relevant Coursework:

- Data Preprocessing & Feature Engineering
- Exploratory Data Analysis (EDA) & Data Visualization
- Supervised & Unsupervised Machine Learning
- Deep Learning (TensorFlow, Keras, CNN)
- Natural Language Processing (NLP)
- Time Series Analysis & Forecasting
- Recommendation Systems
- Model Deployment (Flask, Docker)

---

## SOFT SKILLS

- Analytical Thinking & Data Interpretation
- Problem-Solving with Data-Driven Approach
- Effective Communication (Technical & Non-Technical)
- Attention to Detail
- Adaptability to New Tools & Technologies

---

## ADDITIONAL INFORMATION

Languages: English, Tamil
Interests: Data Analysis, Data Visualization, Kaggle Competitions, Data-Driven Decision Making
